Education

Ramaiah Institute of Technology, B.E in Computer Science Engineering — Aug 2023 – May 2027
Specialisation in **Cybersecurity**

- CGPA: 9.52/10.00 (Till 6th Semester)
- **Coursework:** Computer Networking, Computational Theory, DataBase Management System, Operating System, DevOps, NoSQL

Experience

Summer Intern, Fidelity Investments - Bangalore — May 2026 – Jul 2026

- Built a reusable test automation framework covering 2 of the extraction and validation scenarios, enabling centralized persistence of results and improving test coverage across data pipelines
- Automated validation and reconciliation of data extracted from Azure Blob Storage against source records, ensuring high data accuracy and consistency across thousands of participant records

Project Intern, Hewlett Packard Enterprise(HPE)-Remote — Apr 2025 – Jan 2026

- Developed a confidential-computing prototype for protection of data in-use, building a zero-trust telemetry aggregation pipeline that sent encrypted metrics & enabled federated learning across them with 78% accuracy
- Implemented continuous Trusted Platform Module(TPM) remote attestation with a centralized verification service and flagging compromised nodes within seconds

Intern Trainee, ISRO-Leos Bangalore — Aug 2025 – Sep 2025

- Developed an AI pipeline for processing and interpreting satellite imagery, improving object recognition for autonomous navigation while supporting sub-meter precision and inference latency below 20 ms
- Prototyped ML model for spacecraft simulation environments, ensuring high reliability and low-latency performance for real-time manuevring

Projects

CortexMD (Team Lead, Full Stack Developer)

- Developed a multimodal clinical AI system integrating text, image, video, and voice diagnostics with real-time risk monitoring
- Implemented Explainable AI pipelines using first-order logic, knowledge graphs, and confidence-based medical verification for transparent decision-making
- Engineered clinical-ready modules with UMLS integration, ontology mapping, and NVIDIA Clara-powered imaging

Fence.AI - Deepfake Detection and Media Verification (Backend Developer)

- Devised a tool that protects ordinary images from deepfake generation by injecting adversarial perturbations into the image's latent space, hallucinating image-gen models before they can produce a deepfake
- Developed an XAI-powered deepfake detection service in Python to authenticate content on social media using 1-click extension
- Built a blockchain based community-driven voting module to enhance detection accuracy through human-AI collaboration

Skills

Languages: Python, Java, C, Latex, Javascript
Frameworks: graphQL, RestAPI, React.js, Node.js, Next.js, PyTorch, TensorFlow,
Methodologies & Automation: Agile, Scrum, SDLC, Workflow Automation, System Integration
Tools & Platforms: Docker, Kubernetes, PostgreSQL, GCP, MongoDB, Git, GitHub,

Achievements

- Runner-Up, Smart India Hackathon 2024 - Built EduMitra project used by Government of Rajasthan
- Winner, HPE Think-a-thon 2025
- Winner, CIDECODE PES 2025 — Fence.AI project recognised by the Hon'ble Home Minister of Karnataka
- 10x National Level Hackathon Winner and 7x Capture the Flag Winner

Leadership / Extra-Curricular

IEEE - Member of Computational Intelligence Society — Jan 2025 – Jan 2026
Lead, Google Developer Group — Dec 2024 – Present
Founding Member, secuRIT - MSRIT's Cybersecurity Club — February 2024 – Present
